

PRACTISE TEST II , 2025-2026
CLASS X
SOCIAL SCIENCE (CODE - 087)
GEOGRAPHY ANSWER KEY

- Students will divide the answer book in 04 sections in Social Science for writing the answers .
- Replies to questions are to be written only within the space identified for the concerned section .
- Reply of a section should not be written or mixed in any other section.
- If replies are mixed , these will not be evaluated and no marks will be awarded .

SECTION B

GEOGRAPHY (20 marks)

10. What is the primary factor responsible for the reddish colour of red soil? (1)

A. High clay content

B. Presence of kankar nodules in the subsoil

C. High moisture content

D. **Diffusion of iron in crystalline and metamorphic rocks [Answer]**

11. Identify the appropriate option to fill in the empty boxes: (1)

Names of the crops	Salient features
Millets	Coarse grains
?	Both food crop and fodder crop
?	India is the second largest producer of this crop only after Brazil.

Options-

A. Sugarcane , Pulses

B. Maize, Wheat

C. **Maize, Sugarcane[Answer]**

D. Pulses, Maize

12. Which of the following is **NOT** a method of water conservation? (1)

- A. Rainwater harvesting
- B. Drip irrigation
- C. Over-irrigation [Answer]**
- D. Watershed management

13. There are two statements given below, marked as Assertion (A) and Reason (R). Read the statements and choose the correct option. (1)

Assertion (A) – All North-eastern states of India and parts of Gujarat, have a very high percentage of their forests as unclassified forests managed by local communities.

Reason (R) – These forests are owned exclusively by the Central Government.

Options-

- A. Both A and R are true, and R is the correct explanation of A.
- B. Both A and R are true, but R is not the correct explanation of A.
- C. A is true, but R is false.[Answer]**
- D. A is false , but R is true.

14. Which of the following statement is **NOT** correct in context of natural gas? (1)

- A. Natural Gas is found with petroleum deposits and is released when crude oil is brought to the surface.
- B. It can be used as a domestic and industrial fuel.
- C. It is used as fuel in power sector to generate electricity.
- D. It is also emerging as a preferred transport fuel (PNG) and cooking fuel (CNG) at homes.[Answer]**

15. Which of the following is **NOT** an appropriate measure to control industrial pollution? (1)

- A. Use of scrubbers
- B. Recycling of waste
- C. Dumping waste in rivers[Answer]**
- D. Treatment of effluents

16. Explain with examples how mining sites and overgrazing in different areas become the reasons for land degradation in India . (2)

Answer-Some human activities such as over grazing, mining etc. have contributed significantly in land degradation.

- Mining sites are abandoned after excavation work is complete leaving deep scars and traces of over-burdening. In states like Jharkhand, Chhattisgarh, Madhya Pradesh and Odisha deforestation due to mining have caused severe land degradation. The mineral processing like grinding of limestone for cement industry and calcite and soapstone for ceramic industry generate huge quantity of dust in the atmosphere. It retards the process of infiltration of water into the soil after it settles down on the land.
- In states like Gujarat, Rajasthan, Madhya Pradesh and Maharashtra overgrazing is one of the main reasons for land degradation.

17.A. Analyse the concept of manufacturing with suitable examples and evaluate how industries are classified according to their main roles in the economy.

(2+3=5)

Answer-

First part-

- Production of goods in large quantities after processing from raw materials to more valuable products is called manufacturing. For example, paper is manufactured from wood, sugar from sugarcane, iron and steel from iron ore and aluminium from bauxite. Some types of clothes are manufactured from yarn which itself is an industrial product.
- People employed in the secondary activities manufacture the primary materials into finished goods. The workers employed in steel factories, car, breweries, textile industries, bakeries etc. fall into this category. Some people are employed in providing services.

Second part-

According to their main role:

- a) Basic or key industries are those which supply their products as raw materials to manufacture other goods e.g. iron and steel and copper smelting, aluminium smelting.
- b) Consumer industries that produce goods for direct use by consumers – sugar, toothpaste, paper, sewing machines, fans etc.

OR

17.B. Explain why cotton textile industry is a labour-oriented industry. Mention two implications of noise pollution and suggest two ways to check noise pollution.

(2+3=5)

Answer- First part-

The textile industry occupies unique position in the Indian economy, because it contributes significantly to industrial production, employment generation and foreign exchange earnings.

- This industry has close links with agriculture and provides a living to farmers, cotton boll pluckers and workers engaged in ginning, spinning, weaving, dyeing, designing, packaging, tailoring and sewing.
- The handspun khadi provides large scale employment to weavers in their homes as a cottage industry.

Second part-

The implications of noise pollution are –

- Noise pollution not only results in irritation and anger.
- It can also cause hearing impairment, increased heart rate and blood pressure among other physiological effects.
- Unwanted sound is an irritant and a source of stress.

[Any two]

Two ways to check noise pollution are –

- Machinery and equipment can be used and generators should be fitted with silencers.
- Almost all machinery can be redesigned to increase energy efficiency and reduce noise.
- Noise absorbing material may be used apart from personal use of earplugs and earphones.

[Any two ways]

18. Read the given text and answer the following questions

(1+2+1 = 4)

We use different things in our daily life made from metal. The earth's crust is made up of different minerals embedded in the rocks. Various metals are extracted from these minerals after proper refinement. Minerals are an indispensable part of our lives. Almost everything we use, from a tiny pin to a towering building or a big ship, all are made from minerals. The railway lines and the tarmac (paving) of the roads, our implements and machinery too are made from minerals. Cars, buses, trains, aeroplanes are manufactured from minerals and run on power resources derived from the earth. Even the food that we eat contains minerals. In all stages of development, human beings have used minerals for their livelihood, decoration, festivities, religious and ceremonial rites.

18.1. Name two types of rocks in which minerals occur.

(1)

Answer- Minerals are found in igneous , sedimentary and metamorphic rocks .[Any two]

18.2. Why are minerals considered indispensable for human life?

(2)

Answer- Minerals are considered indispensable for human life as –

- Almost everything we use, from a tiny pin to a towering building or a big ship, all are made from minerals.
- The railway lines and the tarmac (paving) of the roads, our implements and machinery too are made from minerals.

- Cars, buses, trains, aeroplanes are manufactured from minerals and run on power resources derived from the earth.
- Even the food that we eat contains minerals.
- In all stages of development, human beings have used minerals for their livelihood, decoration, festivities, religious and ceremonial rites.

[Any two relevant reasons]

18.3. Give two examples of non-metallic minerals . (1)

Answer – Two examples of non-metallic minerals are mica, salt, potash, sulphur, granite, limestone, marble , sandstone , gypsum , dolomite , quartz , feldspar , clay , graphite , halite, phosphorite . **[Any two]**

MAP SKILL BASED QUESTION (3 marks)

19. On the same outline map of India locate and label the following with suitable symbols :

(1)

I. (p) A cotton textile industrial centre in Madhya Pradesh

OR

(q) A software technology park in Kerala

II. Locate and label any two of the following : (1x2=2)

i. A major sea port in Andhra Pradesh

ii. An international airport in Telangana

iii. A dam on the river Narmada
