Any other relevant points.

31. Ans- The major challenges which the political parties face in the present era are.

(a) Lack of internal democracy:- In political parties there is a concentration of power in hands of few, Parties do not keep membership registers, do not hold organizational meetings, and do not conduct internal elections regularly.

(b) Dynastic succession:- It is one of the major challenges faced by political parties in India. Very few ordinary workers in India get a chance to rise to the top of the party and top positions are always controlled by the one family.

(c) Money and muscle power:- The main objective of political party is to capture [power and form the government so they focus only on winning the elections. They tend to nominate those candidates who have or can raise lots of money. Many business houses influence the decisions of the party and government by providing funds to the parties.

(d) Decline of meaningful choices:- In recent years, there has been a decline in the ideological differences among parties in most parts of the world. Voters do not have many options during elections.

Any other relevant points

OR

Ans:- In a democratic set-up, political parties are required because without political parties.

(a) Every candidate in the elections will be independent. No promises could be made and the utility of the government formed will remain uncertain.

(b) No one will be responsible for running the country. Elected representatives will only be accountable to their constituencies.

(c) There will be no agency to gather and present different views to the government on various issues.

(d) No one will be responsible for bringing various representatives together so as to form a responsible government.

(e) There will be no mechanism to support the government make policies or to justify or oppose them.

32. Ans: (a)- Irrational consumption and over exploitation of resource without consideration for the future generations have led to grave socio-economic and environmental problems.

(b) Social and economic distinctions on the basis of the haves and the have-nots and global ecological problems like global warming, ozone layer depletion, environmental pollution and land

degradation pollution and land degradation are all consequences of uncontrolled exploitation resources.

(c) To overcome these problems and to [reserve resources for our future generations as well, conservation of resources.

(d) Gandhi expressed his concern about resource conservation through these words. "There is enough for everybody's need but not for anybody's greed". According to Gandhiji, greedy and selfish individuals and exploitative nature of modern technology are the root cause for resource depletion at the global level. He advocated production masses and was against mass production by that lead to uncontrolled exploitation of resources.

(e) Accumulation of resources in a few hands due to indiscriminate exploitation of resources has divided the society into rich and poor. An equitable distribution of resources has become essential for sustainable quality of life and global peace.

Any other relevant points

OR

Ans:- Resource planning is a complex process which involves:

(a) Identification of resources across the country through surveying, mapping and preparation of inventory of resources through the quantitative and qualitative estimation and measurement.

(b) Develop a planning structure for resource development taking into account technology, skill and infrastructure available for implementing the plans.

(c) Matching the resource development plans with overall national development plans. This involves systematic planning of exploitation of resource.

Resource planning is important in a country like India, which has enormous diversity in in the availability of resources. While some regions are rich in certain types of resources, they may be deficient in some other type of resources. For example, a mineral-region may be poor in infrastructure or may sicio-culturally backward and included in economically backward regions. Some regions are self -sufficient in terms of availability of resources, while on the other hand, there are regions that face on acute shortage of resources

Thus, proper development distribution, sharing and utilization of resource taking into consideration the technology, quality of human resource and historical experiences of the people, resource planning is essential for development.

Any other relevant points.
